Re: Computer Vision Engineer (Markham, ON) – Tenth Revolution Group

Dear Hiring Manager,

I am applying for the Computer Vision Engineer role in Markham. I have a PhD (University of Trento, 2025), a B.Eng in Electronic Engineering, and 10+ years across industry and academia. For 5.5 years at MAS Holdings I built and ran computer vision systems on live production floors in C++ and OpenCV. The clearest example is an automated care-label QC system that used OpenCV template and feature matching and moved from a flatbed scanner to an industrial camera on a conveyor with PLC-controlled reject. It cut inspection time by 99.5% and raised throughput by up to 300%, with a human-in-the-loop path for borderline cases.

That work lines up with what the posting asks for. I built a loom-side fabric-defect detection system on a microscopic camera array that cut operator headcount by 50% in the pilot, and OCR and layout-segmentation pipelines for document digitization. I also reverse-engineered PLC trigger points and coordinated three closed-loop subsystems in custom C++ for a direct-to-garment printer integration, so I am used to owning the boundary between vision software and factory hardware. I have trained engineering teams on computer vision and represented my group at international trade shows, so customer-facing work and travel are familiar.

On the stated requirements, my production C++ has been on Linux and embedded toolchains rather than Visual Studio on Windows, and I have not worked with Qt, MFC, AutoCAD or PCB schematic capture. My electronics degree and the camera, PLC and sensor integration I have done give me a base for the electrical side, and I would pick up the Windows toolchain quickly.

I am a Canadian permanent resident based in Toronto, ON, eligible to work without sponsorship, and available immediately, including for travel to customer sites. I would welcome the chance to discuss how my experience in industrial computer vision and automation can support your client's vision team at Tenth Revolution Group. My portfolio and publications are at nishal.xyz.

Sincerely,

Nishal Stanislaus Silva, PhD
