Re: Machine Learning Engineer – Wave HQ

Dear Hiring Manager,

I am applying for the Machine Learning Engineer role on the Machine Learning team at Wave. I am a Machine Learning Engineer with a PhD (University of Trento, 2025) and 10+ years across industry and academia, and I build end-to-end ML systems and run them in production: data ingestion, feature engineering, training, orchestration, deployment and monitoring. Building reliable, observable ML pipelines that help small businesses thrive, alongside risk, product and engineering partners, is the kind of work I want to do.

Three parts of your posting match my work directly. For deploying models into production, I owned the full pipeline of a published real-time pattern detection system, from data acquisition to deployment and monitoring, running at 14 ms on a Raspberry Pi 4, 74x faster than the DTW baseline, at F1 0.76 (Journal of the Audio Engineering Society, 2026). For orchestration and MLOps, I have built Airflow DAGs for ingestion, feature extraction and loading into Snowflake on AWS (S3, RDS, MWAA), with Docker, Jenkins CI/CD and pytest, and I have used MLflow. For financial risk, at Forestpin I designed and deployed ML and statistical pipelines for financial forensics and compliance monitoring, plus SQL and Python scoring services for anomaly flagging, working with compliance stakeholders to turn requirements into technical specs.

I should be direct about the gaps. My AWS work has been on EC2, S3, ECS, MWAA and RDS, with SageMaker only lightly; I have not used Databricks, Redshift, Spark or Glue, Terraform, Kubeflow or SageMaker Feature Store in production, and my governance experience is practical (reproducible pipelines, documentation, monitoring) rather than formal lineage or cataloging tooling. I have built the same pieces with other tools, and I expect to pick up your stack quickly.

I am a Canadian permanent resident based in Toronto, ON, eligible to work without sponsorship, and available immediately. I would welcome the opportunity to discuss how my experience can support the Machine Learning team at Wave HQ. My portfolio, publications and open datasets are available at nishal.xyz.

Sincerely,

Nishal Stanislaus Silva, PhD
