Re: Audio Software Engineer, EA SPORTS UFC – EA SPORTS

Dear Hiring Manager,

I am applying for the Audio Software Engineer role on the UFC Audio team at EA SPORTS. I have a PhD (University of Trento, 2025) and 10+ years across industry and academia, and my work is real-time audio software in C++ that has to meet hard latency and CPU limits. I am also a performing guitarist with 15+ years on stage, so audio that feels right to artists and designers matters to me.

Three parts of your posting match my work directly. For C++ on real-time, performance-sensitive systems, I released Nebula, an open-source C++17 audio feature-extraction library with per-feature latency benchmarking on ARM and Raspberry Pi, and at MAS Holdings I wrote custom C++ for closed-loop industrial subsystems. For real-time audio, my published system runs at 14 ms on a Raspberry Pi 4 at 31.4% CPU, 74x faster than the DTW baseline at F1 0.76 (Journal of the Audio Engineering Society, 2026), delivered as a JUCE VST plugin on Elk Audio OS. For tools and workflows, I built the data acquisition, evaluation and deployment pipelines around it and documented them for long-term maintenance, working with musicians and engineers.

I should be direct about the gaps. I have not shipped a game or worked on console platforms, and I have not used a game audio middleware engine in production. My multithreading experience comes from real-time audio plugins and embedded pipelines rather than a large game codebase. I debug and profile memory and CPU on constrained hardware, and I expect to learn your codebase and tooling quickly. I am also curious about AI-assisted tools and would check their output against profiling and tests before trusting it.

I understand the team works onsite in Burnaby three days a week, Tuesday to Thursday. I am a Canadian permanent resident based in Toronto, ON, eligible to work without sponsorship, and available immediately. I would welcome the chance to discuss how my real-time audio and C++ experience can support the UFC Audio team at EA SPORTS. My portfolio, publications and open datasets are available at nishal.xyz.

Sincerely,

Nishal Stanislaus Silva, PhD
