Re: Senior Machine Learning Engineer – GuruLink

Dear Hiring Team,

I am applying for the Senior Machine Learning Engineer role (remote, Toronto) with your client through GuruLink. I am a Machine Learning Engineer with a PhD (University of Trento, 2025) and 10+ years across industry and academia, and I take ML work from experiment to production. The part of your posting I find most relevant is turning research into reliable systems, with monitoring and evaluation around the model, which is how I have worked at MAS Holdings and at Trento.

Three parts of your posting match my work directly. For deep learning in production, I built and deployed computer vision systems at MAS Holdings that raised operational efficiency by up to 300%, and cut inspection time by 99.5% for care-label inspection. For high-performance inference, my published system runs at 14 ms with F1 0.76 on a Raspberry Pi 4, 74x faster than the DTW baseline (Journal of the Audio Engineering Society, 2026), and I owned its full lifecycle from data acquisition to deployment and monitoring. For evaluation and engineering practice, I design benchmark suites with baselines and ablations, I released four open datasets on Zenodo, and at MAS I mentored engineers and introduced code review and CI/CD.

I should be direct about the gaps. I have used PyTorch and TensorFlow/Keras, scikit-learn and Airflow with Docker on AWS, but not Spark, Google Cloud Platform or XGBoost in production, and my recommender and A/B testing experience is lighter than my vision and time-series work. I have built comparable pieces with other tools, and I expect to pick up your stack quickly. I would aim to contribute early on inference performance and on model evaluation and monitoring.

I am a Canadian permanent resident based in Toronto, ON, eligible to work without sponsorship, and available immediately. I would welcome the opportunity to discuss how my experience can support the Machine Learning team at GuruLink's client. My portfolio, publications and open datasets are available at nishal.xyz.

Sincerely,

Nishal Stanislaus Silva, PhD
