Re: AI and Data - Manager - AI/ML Engineer – EY

Dear Hiring Manager,

I am applying for the AI and Data - Manager - AI/ML Engineer role in Calgary. I am a Machine Learning Engineer with a PhD (University of Trento, 2025) and 10+ years across industry and academia, and I build end-to-end ML systems from use case through design, deployment and monitoring. At MAS Holdings I led ML and computer vision systems for manufacturing, working with operations and engineering stakeholders to turn business needs into measurable results: care-label inspection time cut by 99.5% and operational efficiency raised by up to 300%. Delivering AI that clients can rely on is the part of your posting that fits my work best.

Three parts of the posting match my experience. For delivery and leadership, I led the MAS systems from scope to deployment across multiple sites, mentored engineers, and introduced code review, testing and CI/CD practices. For testing and validation, I design benchmark suites with baselines and ablations to quantify tradeoffs before anything ships, and I released four open datasets on Zenodo. For production ML, my published system runs at 14 ms with F1 0.76 on a Raspberry Pi 4, 74x faster than the DTW baseline (Journal of the Audio Engineering Society, 2026), and I owned its full lifecycle from data acquisition to deployment and monitoring, using Python, PyTorch, TensorFlow, scikit-learn, Docker, Git and AWS.

I should be direct about the gaps. My cloud work has been on AWS (S3, ECS, MWAA, SageMaker) and not Azure or GCP in production. I have not worked in professional services or consulting, I have not held a Manager title, and I have not used DeepChecks or run formal bias and fairness audits, though I have worked with LLMs and human-in-the-loop systems. I have led and mentored engineers and delivered against milestones with stakeholders, and I expect to learn client-facing delivery and the tooling quickly.

I am a Canadian permanent resident, eligible to work without sponsorship, based in Toronto, ON and open to relocating to Calgary. I am available immediately. I would welcome the opportunity to discuss how my experience can support the AI and Data team at EY. My portfolio, publications and open datasets are available at nishal.xyz.

Sincerely,

Nishal Stanislaus Silva, PhD
